

LEAK HUNTER

EARLY LEAK DETECTION SYSTEM
FOR TRANSMISSION PIPELINES

BY NETICO

Turn the page 

TIME is gold. In particular when it comes to leaks, seconds count. Usually starting with a small breach, a leakage may grow to a catastrophe if not contained at the very early stages.

Leak Hunter is a... Stationary, yet dynamic system that watches the transmission pipeline constantly. It can detect and **PINPOINT** the precise location of leaks in a few seconds.

As pipelines age, corrosions deepen, and odds for the leaks rise, so does the need for a practical & **AFFORDABLE SOLUTION:**
A **LEAK HUNTER**...

Leak Hunter is on the crossroad where... **RELIABILITY,**
Precision,
& **Speed** meet.

More on the Leak Hunter on:

LEAK HUNTER

Oil & Gas industries spend huge amounts of money on property loss caused by pipeline incidents.

Water utilities lose up to 40% of the treated water before reaching the consumers. Half of the water loss is due to leaks in transmission pipelines.

Leak Hunter is a...
Leak detector, leak locator, pipeline MONITOR, pipeline simulator, long term recorder (pressure, temperature, flow, etc.), & batch tracking system.

Leak Hunter works...
based on 3 main algorithms:
- Pressure wave propagation
- Mass balance
- Pipeline state machine
Supported by several other algorithms that run in parallel to ensure FAST & ACCURATE action.

Leak Hunter is easy...
to install. It can work as stand-alone with its own HMI OR as integrated in an existing SCADA system.
